Wangen Progressive Cavity Pumps

Flow Rates - ml's/min - 56,000 l/hr (250 gpm)
up to 720 psi, Twin Screw pump range up to
440 gpm and 362 psi, Wide range of materials
& process applications

Wangen Hygienic Twin Pump

Designed for low & highly viscous, volatile or gaseous
applications where maximum hygiene & efficiency is required.
Designed for food & beverages, chemicals & cosmetics
Flowrates up to 200 m³/h, Pressures up to 30 bar, Temp.
up to 130° C, Viscosity up to 1.000.000 mPas

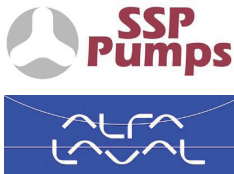

Metering Pumps - Diaphragm & Packed Plunger

TripKO metering and dosing pumps are the ideal choice for
industrial and municipal applications. These versatile pumps are
designed for a variety of water treatment chemicals, reagents,
acids, caustics, polymers, and slurries. Flow rates up to 1008
Liters/hr (266 GPH), Pressures 10 Bar (150 PSI)

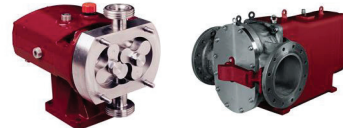

Portable & Large Mixers & Agitators

Water & Waste Water - Pulp & Paper - Food &
Beverage - Pharmaceutical Biotechnology
Chemical Processing
Portables, Top Entry & Side Entry Designs

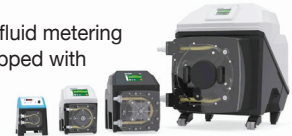

SSP - Alfa Laval Rotary Lobe Metering & Transfer Pumps

Flow Rates up to 680 m³/hr. - (3000 GPM)
Pressures up to 20 Bar- (296 PSI)
Low Shear - Robust Design Easy Maintenance

Blue-White® Peristaltic Metering Pumps

Blue-White's FLEXFLO® Peristaltic Metering Pumps deliver precision fluid metering
for a wide range of control capabilities. FLEXFLO® pumps come equipped with
Blue-White's patented, built-in Tube Failure Detection System (TFD).
FLEXFLO® pumps offer selfpriming, low-maintenance metering
pumps offer a gentle, low shear pumping action

Blue-White® Diaphragm Metering Pumps

Blue-White's CHEM-FEED® Diaphragm Metering Pumps
accurately feed chemicals in high-pressure applications
and require minimal downtime. The exclusive DiaFlex®
Diaphragms are constructed of PVDF for exceptional
chemical compatibility & guaranteed for the life of the pump

Blue-White® Skid Systems

CHEM-FEED® Engineered Skid Systems are designed
using solid modeling tools for superior piping installation
and easy maintenance. Universal mounting blocks provide
for easy servicing and replacement. Available in Single,
Duplex, and Triplex models, the CHEM-FEED® Skid
Systems come fully assembled for easy installation.

KGO Group Ltd.

"The Benefit of Experience"
Engineered pump & process systems

Liquid & Dry Processing Systems

Polymers, Clays, Minerals, Starch

Full Range of Sizes, Standard & Custom Designs,
Certified Control Panels

Exceptional Documentation Manuals & Drawings

KGO Group Ltd.

"The Benefit of Experience"
Engineered pump & process systems

Custom Pump Packages

Progressive Cavity,
Diaphragm Metering
Peristaltic & Hose, Rotary Lobe
Gear & Centrifugal,
Controls & Instrumentation

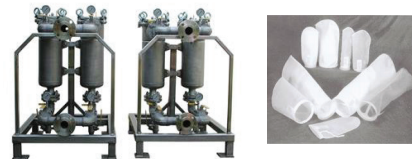

KGO Group Ltd.

"The Benefit of Experience"
Engineered pump & process systems

Bag Filter & Strainer Systems Replacement Bags & Cartridges

Water - Process Fluids - Chemicals
Packaged Components including fitted
piping systems, valves, gauges
Custom units available

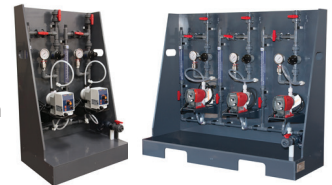

KGO Group Ltd.

"The Benefit of Experience"
Engineered pumps & process systems

Metering Pump Systems

Packaged Pump & Instrument Panels

Variety of Solenoid, Motor Drive, & Peristaltic Pump
configurations with optional controls, robust construction
& safety built into each system: applications for water
treatment, boiler & cooling tower, feed & bleed

KGO Group Ltd.

"The Benefit of Experience"
Engineered pump & process systems

Typhoon HydraMix Mixing & Conveying System

*Provides Superior Mixing of Powders & Liquids,
Excellent Conveying Capacity*
Flow Range Up to 1000 L/m. Powder Mixing up to
50kg/min. — Custom units available on request

Plas-Tanks
Industries Inc.

ISO 9000 - RTP 1 Registered

**Custom-built Corrosion Resistant Fiberglass
Reinforced Plastic (F.R.P.)**

Tanks - Vessels, & Scrubbers
Bryneer - Bulk Salt Storage & Brine Makers

Rental Equipment Available

Small volume liquid and dry polymer systems
- Progressive Cavity Pump Systems - Bag
Filters & Systems
